## To Whom it may concern

SUBJECT: LETTER OF REFERENCE

Dear Sir/Madam

We (The **GCC Electrical Testing Laboratory Company** "GCCLAB") confirm that **Sea Marconi Technologies S.a.s**, during the month of November 2018, performed a Training Session for Insulating fluids and Transformer Oil Treatments. The training has been provided to our GCCLAB Staff, Saudi Electricity Company, Saudi Aramco and others.

The Training courses suggested by Sea Marconi are being conducted by highly skilled Trainers with a large and extensive professional experience in the following aspects:

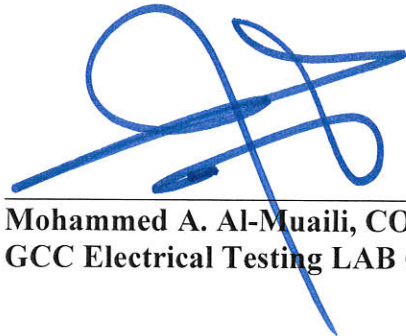

- **Diagnostics:** analyses and the diagnoses of the oil through which it is possible to identify criticalities (functional or environmental) of the transformers.
- **Treatments:** the "therapies", i.e. the treatments of the oils and transformers thanks to which it is possible to eliminate or mitigate most of the criticalities diagnosed.

The training is comprehensive and runs from training of Technicians in the field to Managerial issues, embracing the most detailed operational techniques as well as normative, technical, safety and environmental concepts.

**We, therefore, recommend Sea Marconi as suitable Company for Training courses capacity in the aforementioned fields.**

This letter of reference was issued upon Sea Marconi Request with no further responsibility on the GCCLAB.

Yours Faithfully

Mohammed A. Al-Muaili, COO  
GCC Electrical Testing LAB Co.
